SUMMARY

Full Stack Developer building web applications with TypeScript, React, Next.js and NestJS. I work with clients to define requirements and develop interfaces, backend services and integrations. Experience with PostgreSQL, multi-tenant applications and AWS infrastructure using containers and infrastructure as code. I use AI tools throughout development, reviewing and testing their output. English B2.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React, Next.js 15, Tailwind CSS, Ant Design, Radix UI, Shadcn/ui, Framer Motion

State & Data: TanStack Query (React Query v5), tRPC v11, Zustand, SSE, Webhooks

Backend & Architecture: Node.js, NestJS, REST API design, multi-tenant systems, RBAC, service orchestration, JWT, NextAuth/Auth.js, AWS Cognito

Databases: PostgreSQL, TypeORM, Drizzle ORM, Prisma, Redis (Upstash / ioredis)

Cloud & Infrastructure: AWS (CDK, ECS/EC2, ECR, RDS, S3, SQS, CloudFront, Cognito), IAM, Secrets Manager, CloudWatch

AI & Automation: LLM integration (Anthropic Claude, OpenAI, Grok), agentic development workflows, privacy-first AI pipelines, Puppeteer, Playwright

DevOps: Docker, Git, GitHub Actions (OIDC), GitLab CI/CD, CloudFormation, ESLint, Prettier

Integrations: REST APIs, OAuth 2.0, Webhooks, Mercado Pago, AMQP / RabbitMQ

Testing: Jest, Supertest

EXPERIENCE

Full Stack Developer · [Brace Developers](#)

Oct 2025 - Present

TypeScript · React · NestJS · TypeORM · PostgreSQL · AWS · Next.js 15

- Develop interfaces, APIs and integrations for client applications including Avateen, PLY, Incolflex and EIA Campo Guamal.
- Work with clients and the team to define requirements, prioritize changes and improve usability.
- Work with PostgreSQL, role-based permissions, multi-tenant systems, external APIs and AI integrations.
- Contribute to AWS deployments and maintenance, code review, testing and CI/CD workflows.

Full Stack Developer · [Firenze · Ice cream shop and café](#)

2026

Next.js · NestJS · PostgreSQL · OpenAPI · AWS · Mercado Pago · Android

- Developed a web storefront and management console for catalog, orders and branch operations, with role-based access.
- Defined infrastructure with AWS CDK and CloudFormation: ECS/EC2 containers, PostgreSQL on RDS and S3/SQS services.
- Worked on IAM permissions, secrets management, observability and GitHub Actions deployment workflows.
- Implemented OpenAPI contracts, an Android app and receipt printing; prepared WhatsApp and Mercado Pago integrations.

Full Stack Developer - Internship · Robolytics

Jul 2025 - Nov 2025

NestJS · PostgreSQL (no ORM) · Next.js · Puppeteer · Playwright · Grok (LLM) · GitLab CI

- Worked across three NestJS services using direct PostgreSQL clients, schema design and migrations without an ORM.
- Developed scraping and ingestion with Puppeteer and Playwright, and LLM-based product normalization.
- Centralized scraper configuration to support new sources and libraries independently.
- Contributed to the Next.js frontend with Ant Design and Recharts and to GitLab and GitHub CI/CD workflows.

Full Stack Developer · WePlay · Personal project

Since Sep 2024

Next.js 15 · tRPC v11 · Drizzle ORM · Redis (Upstash) · AWS S3 / Lambda · NextAuth · Livekit

- Personal project for meeting people, playing together and learning as a community. Currently paused, with plans to resume.
- Built rooms and participant management with PostgreSQL and tRPC; real-time synchronization with SSE and Redis pub/sub.
- Integrated Auth.js authentication, S3 file storage and LiveKit voice communication.

Full Stack Developer · Nisaley · E-commerce MVP

Dec 2024 - Jan 2025

Next.js 15 · tRPC · TanStack Query · Zustand · Drizzle ORM · AWS S3 · Mercado Pago

- Delivered a functional MVP in under six weeks: catalog, product management, Mercado Pago checkout, QR codes and S3 images.
- Managed queries and caching with TanStack Query, global state with Zustand and authentication with the Drizzle adapter.

Backend Developer · Trabajo en Digital

Mar 2024 - Sep 2024

tRPC · PostgreSQL · Node.js

- Designed endpoints, validations and query optimizations; resolved critical bugs in job listings and application flows.
- Created automated testing processes and database optimization scripts to improve backend stability.

EDUCATION

Full Stack Developer — Henry Bootcamp · 700 hours · 2023
